

# The Sentinel Convex & Matrix Railings Systems

DESIGNED TO SUIT APPLICATIONS WHERE THE EMPHASIS IS NOT EXCLUSION BUT PROTECTION, SAFETY AND DEMARCATION MAKE THEM THE SYSTEMS OF CHOICE FOR SCHOOLS PARKS AND PLAYGROUNDS.

## Benefits

### Built in rigidity

Very high rigidity achieved by using unique custom rolled 'C' section to top and bottom rails with welded vertical infill tubes.

### Aesthetics

The panels provide a robust yet extremely decorative and elegant finish. The panel's posts and gates are all designed with the same eye for detail. Sentinel railings are a professional range of fences with a contemporary design.

### Safety

All systems are designed to comply with the highest standards for both parks, schools and play areas.

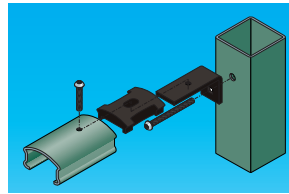

### Easy installation

This system is designed to be easily installed and all components are designed to be fully integrated and concealed. The system allows for stepping of up to 150mm per panel, to cope with slopping ground.

**Panels**

Panels are available in 4 specifications in a full range of heights from 1.0m to 2.4m. All panels are constructed from custom rolled 'C' section horizontal rails with both round and square vertical tube infill. Different railing styles are available to suit different requirements, both visual and security performance. Bow top options are ideal for applications where safety is paramount importance for example, the enclosure of children's play areas. Where security and deterrence are required, circular or diamond section straight pales with optional square-cut or angle-cut tops to deter climbing are available.

position on the mounting brackets, in both the level and stepping positions. The recess is also

designed to allow the panels to pivot through 5° (250mm) backwards or forwards from the post, for installation around flat or sloping curves.

**Posts**

Rolled and welded square hollow section tube.

1.0m – 1.2m high: 60 x 60 x 2mm

1.5m – 2.0m high: 60 x 60 x 2.5mm

2.4m high: 80 x 80 x 2.5mm

**Unique Fixing System.**

Black GRP spacers are inserted into each end of the horizontal rails and are recessed on the underside to guide the rails into

**Gates**

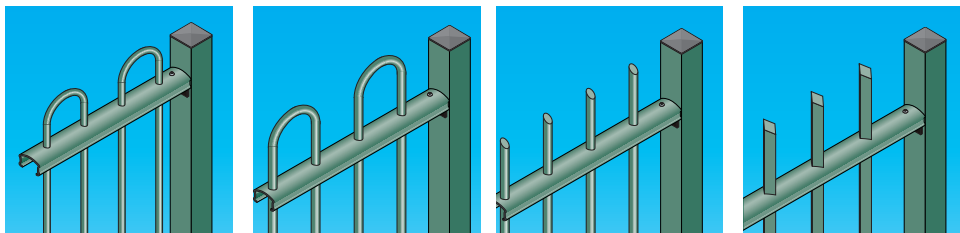

The Sentinel railing systems are totally finished and safely equipped with single or double gates. Infill tubes and gate heights match the adjoining fence panels. Horizontal rails are located at the same height as the adjoining panels, and have 50mm minimum ground clearance.

**Coating**

To pass 1000 hour salt-spray testing  
Galvanizing: hot dipped

Polyester: 60 microns minimum thickness

Colour: RAL 6005 Green – other colours are available by request ●

RAILING PANELS					
Rail style	Tube type	Tube size mm	Fence height mm	Panel size height x width mm	Maximum gap between verticals mm
Sentinel Convex Play	Round	20 diameter	1000	950 x 2850	89
		26 diameter	1200	1150 x 2850	
Sentinel Convex Bow Top		1500	1450 x 2850	99	
Sentinel Convex		26 diameter	1800		1750 x 2850
		2000	1950 x 2850		
Sentinel Matrix		Square	25 square	2400	2350 x 2850

**Applications**

A versatile railing system ideal for applications where the emphasis is not on exclusion but on protection, safety and demarcation. Such as children's playgrounds, schools, parks and commercial premises.
